

Name: _____

Digital Technologies Project

Dear Parents and Carers,

As part of our Year 3/4 Digital Technologies and Human and Social Sciences learning, each student in our class will be creating a digital photo story timeline about themselves, in the form of a PowerPoint presentation, which will be used as the final assessment task in this learning unit.

To complete this digital timeline, each student will need to provide a USB containing 4 photos of themselves at important stages of their life: as a baby, as a toddler, when they started school, and last year. Students will also have their photo taken at school over the coming weeks, to be included in their timeline as the present stage of their life.

As you find each of the 4 photos, could you please help your child to complete the following worksheet about the photos, including as much of the information as you can. The worksheet contains a space for information about each of the photos, including who is in the photo with them (if anyone), how old they are in the photo, when and where the photo was taken, and if the photo was taken during a special occasion (such as a birthday, wedding or Christmas).

It is important that every student in the class provides the photos if possible, as this task is one of our major assessments in Digital Technologies for this year.

Please be aware that these photographs will only be used within our class, and will not be exhibited or passed around the school or community. However, if you are against your child using photos of them self during this task, please let your child's teacher know as soon as possible, so alternative arrangements can be made, such as your child drawing pictures as a replacement for the photos of each stage of their life.

Kind Regards,

[Class Teacher]
